I am writing to oppose the proposed increase in charges to solar and other customers. I understand that solar customers will be charged a fee because they are not contributing enough revenue to Rocky Mountain Power.

This is appalling- solar is a big investment to begin with and it is not only a personal investment to save money over the long-term, but an investment in our beautiful city which needs no additional fossil fuels in the system.

We are ranked among the top in the nation for potential solar usage and we should be making this cheaper and easier for all citizens, as a way of cleaning up the air and doing our part for sustainability. The proposed charge to solar customers sends the message that we as a city do not value alternative energy, but instead punish those who choose to invest in it. Thank you, Teddy Anderson, 832 E Wilmington Ave, SLC, UT 84106.
